All,

I was able to speak with Bill Ryan from EPA and get clarification on what is being proposed. As it turns out he himself was not necessarily wanting to use the 'Beach Closed' language but Cascade had mentioned and he was seeing how we felt about this-he apologized for lack of clarity in his previous message. I said we would want to know what EPA wants so we could properly respond. He is drafting language he would recommend and will send to us. He will want to know if we want logo or any other DNR information on this sign.

For reference the attachment above is what is posted now. There has been a public involvement process for cleanup but not for a closure per se and Ryan does not feel this is necessary. There will be an interim action mid-October and the investigation will most likely continue for a few years.

I will forward on his actual request when I receive.

Shayne

Rick - As promised, the beach sign template is attached.

Thanks for your help with this.
